This 8,000 square foot built up Tar and Gravel roof was badly infested with ridges and blisters from years of severe weathering. It was cleaned, repaired, and coated with CanAM elastomeric roof coatings. The roof is sealed and warranted to 10 years.

Benefits of Asphalt Roof Coatings

- Approximately 50% of the cost to tear-off and replace this roof style
- 10 year warranty
- Energy Star rating and Green Building ratings
- Up to 80% sun reflectivity
- Greatly reduced cooling costs
- Eliminates roofing waste
- Minimal disruption to working environment
- Reduced maintenance cost in future
- Reduced negative affects of "heat stress" for prolonged roof life
- UV protection extends roof life
- No increase to roof weight load
- No harmful vapours
