This is an example of a 20,000 square foot metal roof that is fully rusted but free of any perforations. The roof was cleaned and repaired in preparation for a base coat rust inhibitor and then a white elastomeric top coat. This roof is sealed and warranted for 10 years.

Benefits of Metal Roof Coatings

- Approximately 50% of the cost to tear-off and replace a roof
- 10 year warranty
- Energy Star rating and Green Building ratings
- Colour options available (metal only)
- Up to 80% sun reflectivity (in white)
- Greatly reduced cooling costs
- Eliminates roofing waste
- Minimal disruption to working environment
- Reduced maintenance cost in future
- Reduced neg. affects of "heat stress" for prolonged roof life
- UV protection extends roof life
- No increase to roof weight load
- No harmful vapours
